

Identity and Access Management

- **Customer Profile:** Government, Middle East
- **Solution Stack:** Integrated solution stack to cater to the IAM business needs of the organization
- **Industry:** Transport
- **Key Solution Implemented:** Identity Management, Access Governance, Directory Services, Privileged Identity & Access Management, Auditing and Reporting.
- **Pain Points Addressed:**
 1. Disparate Management is replaced by Centralized Management for User identities, roles, entitlements relace by centralized approach and established Role Based Access Control.
 2. Introduced user authentication and authorization using SSO and session management.
 3. Implemented migration strategy and road map for all non-compatible apps.
 4. Leveraged expertise in coding skills to develop custom solutions not available OOTB.
- **Solution:**

- **Customer Value Creation:**
 1. Satisfied the audit and compliance standards of the organization.
 2. Completely customized end user experience via portal services in Arabic and English.
 3. Custom connector development for non-compatible applications provisioning.
 4. Multiple login methods via federated platform.
 5. Multi site high availability DR design.
